Digi-Stem® Thermometers and Transmitters

Digi-Stem Thermometer
with Brazed Stem

- Selectable Stems, Integral or Remote
- Large 1 inch LCD Continuous Display
- Easy to Read from Over 20 Feet
- Battery Operated
- Meter Accuracies from $\pm 0.3^{\circ}\text{F}$ ($\pm 0.2^{\circ}\text{C}$)
- Factory Calibration Lot Traceable to NIST - Optional
- Direct Replacement for Bimetal, Mercury-in-Glass, Bulb and Capillary Thermometers
- Temperature Ranges from 0° to 800°F (-20° to 425°C)
- Easy to Install
- NEMA-4X Stainless Housing
- Hose-Down Proof, Vibration Tolerant
- Optional RTD or Thermocouple Output
- 4-20mA Transmitter with Local Display, Loop Power

Wahl's Digi-Stem Thermometer and Transmitter Systems provide digital accuracy and reliability for temperature measurements in rugged industrial environments.

Our variety of rigid stems and remote interface connections accommodate most installations.

Note: as of 02/10/12 Models
DSX310F and C have been
Discontinued.

A Quick Look at Models Most Often Specified

Model	DST200	DST300	DST310
Range	0° to 199.9°F -20° to 130°C	0° to 300°F	200° to 800°F 100° to 425°C
Display Resolution	0.1°F or $^{\circ}\text{C}$	0.1°F : 0 to 150°F 1°F : above 150°F	1°F or $^{\circ}\text{C}$
Meter Accuracy	$\pm 0.3^{\circ}\text{F}$ $\pm 0.2^{\circ}\text{C}$	$\pm 1.1^{\circ}\text{F}$: 0 to 150°F $\pm 2^{\circ}\text{F}$: above 150°F	$\pm 2^{\circ}\text{F}$: 200° to 600°F $\pm 2^{\circ}\text{C}$: 100° to 425°C

Digi-Stem® Thermometers and Transmitters

Remote Sensor Systems

Digi-Stem is offered in a variety of configurations to measure process temperatures remotely located from the meter. Optional remote sensor cables are available with different stem configurations. Stems can be specified for a variety of process connections or interfaces, including different thermowell adapters, penetration probes and immersion probes. See Ordering Guide on pages 5 and 6.

RTD or Thermocouple Output

Direct Connection: Wahl provides Digi-Stems with optional dual-element temperature sensors in the stem for direct connection to recorders and controllers. The primary sensor drives the local display while the dedicated secondary sensor (RTD or Thermocouple) provides access to a 3- or 4-wire RTD circuit or a Thermocouple system interface. The connecting port is 1/2" NPT.

In Situ Calibration: Specify option DSA392M or DSA392HP for in situ calibration of Digi Stem Model DST200 without removal from a process. This instrument has an RTD as the secondary sensor, which allows single-point calibration using Wahl's highly accurate platinum-RTD Heat Prober 392 Meter. This provides the accuracy of a laboratory calibration, and saves time as well as money.

Transmitter Systems

Wahl offers loop-powered transmitter versions of Digi-Stem with continuous, digital, local display. The transmitter is an integral meter and electronics assembly in NEMA-4X housing with a 4-20mA, 2-wire current loop. Model DSX300 has a temperature range of 0 to 300°F (-18 to 150°C), while Model DSX310's range is 200 to 800°F (100 to 425°C). The transmitters incorporate all Digi-Stem family features, including stainless steel construction, large digital display, reliability, and rugged construction.

Digi-Stem with Sanitary Stem

Note: as of 02/10/12 Models DSX310F and C have been Discontinued.

Stainless Steel Stems

Cut-to-Length: Compression seal; for direct immersion in fluids and for thermowell applications.

Sanitary: Authorized 3-A Sanitary Standard 74-03 for 1.5" to 3.0" diameter tube sizes with tri-clamp fitting for milk, food and pharmaceutical processing.

Spring Loaded: Maintains a positive force against the bottom of thermowells; not for direct immersion in fluids; assembly is not sealed.

Brazed*: For use in thermowells. (Discontinued)

Welded*: Sealed for immersion in fluids; for use in thermowells, sanitary, and high-pressure applications.

*Note: some connections include 1/2" of threads when measuring probe length. Contact Customer Service for information.

The World's Finest Manufacturers of Industrial Temperature, Pressure, Test and Calibration Instruments

CALIBRATION SERVICES

Wahl designs and manufactures to the most stringent quality standards. We provide certified, traceable calibration data in support of companies whose requirements include meeting ISO 9000, FAA and FDA quality standards. Calibrations to both IPTS-68 and ITS-90 are available. Choose from two levels of calibrations services to meet your quality system requirements.

STANDARD CERTIFICATION: Unit is calibrated to factory specifications using NIST traceable equipment. Unit is provided with:

Certificate of Conformance* - Statement that our product meets published specifications. Included when you buy a new product.

Calibration Sticker* - (or tag) Advising you of the date your instrument(s) was/were calibrated, and the suggested date for its next calibration. This is provided when you buy a new product and when you return a product for calibration. (*Most Products)

NIST TRACEABLE TEST REPORT: Unit is calibrated to factory specifications using NIST Traceable equipment. Unit is provided with:

NIST Traceable Test Report - Our quality Management system is certified to conform to ISO9001:2008. We maintain a calibration system in conformance with ANSI/NCSL Z-540 and MIL-STD-45662A.

"Before" and "After" Data with Out of Tolerance conditions noted.

Calibration Sticker (see above).

Why you need to Calibrate your Instruments

- Increase customer satisfaction with consistent products.
- Comply with quality standards.
- Improve product quality.
- Ensure traceability throughout your entire manufacturing process.
- Palmer Wahl offers a complete line of Calibrators to integrate all the necessary functions for adjustment and maintenance of your process.
- Our products are easy to use and Palmer Wahl is there to help, every step of the way.
- Go to: www.palmerwahl.com > Test & Calibration.

REPAIR AND OTHER SERVICES

REGISTER YOUR PRODUCT: Registration is fast and easy. In about a minute you can register your product for Warranty Protection and our Calibration Reminder Service to keep your QC Program in compliance. Go to www.palmerwahl.com/register.

REPAIR SERVICES: Palmer Wahl offers repair and calibration services on most products we sell. Contact Customer Service for pricing, and an RMA. Please see note below.

Detailed Repair Report - Available upon request, this report provides details of evaluation and repairs made.

Custom Points - Palmer Wahl will calibrate your instruments at your specified temperatures.

Special Requests - When calibrating your instrument, our experienced personnel will help you to achieve the level of quality that you need in your facility.

Note: You must have a **Return Merchandise Authorization Number**, (RMA) before returning a product for repair or calibration. To obtain an RMA, please call Customer Service at 1-800-421-2853 or go to www.palmerwahl.com and click on: Service > Product Return Request.

Wahl Digi-Stem® Thermometers are distributed by:

www.palmerwahl.com

Palmer Wahl Warranty
Manufacturer warrants all products listed in this catalog to be free from defects in material or workmanship under normal use and service. The Manufacturer agrees to repair or replace any product which upon examination is revealed to have been defective due to faulty workmanship or material if returned to our factory, transportation charges prepaid, within the product specific warranty period stated in the catalog by the manufacturer. This warranty is in lieu of all other warranties, expressed or implied and of all obligations or liabilities on its part for damages including but not limited to consequential damages, following the use or misuse of instruments sold by the Manufacturer. No agent is authorized to assume for manufacturer any liability except as set forth above.
